

# STEPS TO CREATE ACCOUNT AND ADD REPOSITORY IN GITHUB

## 1. Sign Up for GitHub:

- Go to GitHub.
- Click on Sign up.
- Enter your email, create a password, and choose a username.

## 2. Create a Repository:

- Click the "+" icon (top-right corner) and select "New repository".
- Enter a repository name.
- Choose the repository visibility.
- Click "Create repository".

## 3. Add Folders to the Repository:

- Go to your repository page.
- Click on the "Add file" dropdown and select "Create new file".
- In the file name box, type the folder name followed by a slash.
- Click "Commit new file" after creating each folder.
